

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

LISTING OF CLAIMS:

1. (original) Card comprising a body with a precut microcircuit card, characterized in that a token is also precut in the body of the card next to the microcircuit card.
2. (original) Card according to claim 1, characterized in that the token extends to a corner of the card body.
3. (original) Card according to claim 2, characterized in that the token extends to only one corner of the card body.
4. (original) Card according to claim 3, characterized in that the token extends to the corner at the greatest distance from the card body.
5. (currently amended) Card according to claim 3 [[or claim 4]], characterized in that the token has sides at least approximately parallel to those of the card body.
6. (original) Card according to claim 5, characterized in that the token has sides at least approximately aligned with the sides of the microcircuit card.
7. (currently amended) Card according to ~~any one of claims 1 to 6~~ claim 1, characterized in that the card body conforms to the ID-1 format.

8. (currently amended) Card according to ~~any one of claims 1 to 7~~ claim 1, characterized in that the microcircuit card conforms to the ID-000 format.

9. (currently amended) Card according to ~~any one of claims 1 to 8~~ claim 1, characterized in that the token carries visual information.

10. (currently amended) Card according to ~~any one of claims 1 to 9~~ claim 1, characterized in that the token includes a magnetic strip for storing information.

11. (currently amended) Card according to ~~any one of claims 1 to 10~~ claim 1, characterized in that the token includes a hole through which a key-ring may be passed.

12. (original) Card according to claim 11, characterized in that the hole is in a corner of the token in the vicinity of the microcircuit card.

13. (currently amended) Card according to ~~any one of claims 1 to 12~~ claim 1, characterized in that the token is connected to the remainder of the card body by mechanically weakened areas consisting of grooves.

14. (currently amended) Card according to ~~any one of claims 1 to 13~~ claim 1, characterized in that the token is of the contactless type.

15. (currently amended) Card according to ~~any one of claims 1 to 13~~ claim 1, characterized in that the token is a radio-frequency identification label.

16. (new) Card according to claim 4, characterized in that the token has sides at least approximately parallel to those of the card body.

17. (new) Card according to claim 2, characterized in that the token includes a magnetic strip for storing information.

18. (new) Card according to claim 3, characterized in that the token includes a magnetic strip for storing information.

19. (new) Card according to claim 4, characterized in that the token includes a magnetic strip for storing information.

20. (new) Card according to claim 5, characterized in that the token includes a magnetic strip for storing information.
